MEMORANDUM FOR See Distribution

SUBJECT: Facility NOE/Terrain Flight Policy Clarification

1. Recent events have demonstrated that there is a misunderstanding among our supported aircrew-members regarding regulatory guidance for certain terrain flight operations. Effective immediately, flight under the control of the Facility will adhere to the following rules.

a. The **ONLY** approved NOE/Terrain Flight Routes are those posted on the hazards map in flight operations. Approved routes are surveyed quarterly and known hazards are posted to the map. Additional routes will be considered but are not approved until a complete survey has been accomplished and the route is posted to the hazard map.

b. Under-wire crossing will only be conducted for demonstration purposes, at approved sites, under Day/VMC conditions, and with an IP at the aircraft controls. The facility will survey any recommended under-wire crossing locations and post them to the operations hazard map. There are currently no approved locations on file.

2. POC is the Facility Operations Officer, MAJ Bruce Malarky, at 562-795-1103 or email at Bruce.Malarky@ca.ngb.army.mil.

  
M.A. Lascano  
MAJ, AV, CA ARNG  
Facility Commander
